Season readiness

TITAN 2.0® - Pack house

TITAN 2.0® Website

- Login with registered email and password created: <https://titan.ppecb.com/>
 - Forgot password functionality is available
 - Password must comply to 14 characters: uppercase, lowercase, number and special character
- An Approved Service Request is required minimum 24 hours prior to first inspection
 - For Clients with an Expired or Approved Service Request; the Cloning function can be used
 - For all other Clients, a new Service Request must be created
 - Upload new PPECB Billing letter template Rev. 5 published 04/10/2021 – if needed
 - Upload new Food Safety Certificates or proof of process – if needed

Pack house

- Software Vendor System must be latest updated Version
- Refresher training must be provided to Pack house personnel on how TITAN 2.0® work

For any **eAddendum** and **eCertification** support contact the Operations Systems Support Team

TITAN 2.0® User manuals are available:

<https://ppecb.com/document-category/titan-2-0/training-manuals/product-inspection/>

Changes – Product Inspection

2021 - 2022

Bin Validation

- Identify the Bin Unit of measure from the Pack code and then Validate correctness

Weight Validation

- Verify that Net Weight does not equal 0 (zero)

Class Validation

- Validate that the Class is correct according to the applicable product
- Accepted Class codes for Titan:
 - Extra Class = X; Class 1 = 1; Class 2 = 2; For Processing Purposes Only = P

Service Request Cloning

- Previously a new Service Request had to be created and all the Information had to be added
- Now a User can Clone (copy) a previously Expired or Approved Service Request

UPN construction change

- Previously the UPN was predictable
- Now the UPN is in a unique, secured, alphanumeric format

Duplicate SSCC (pallet ID) Validation

- Validation is checking that duplicate SSCC's (pallet ID's) can not be used for 1st Inspection (202) across different Consignments notes

Consignment note Bulk sign off

- Multiple Consignments notes can be signed off at once

Changes eCertification

2021 - 2022

SOUTH AFRICA was added to the eCertificate

- Country: South Africa was included in the Address box on the eCertificate

Updated the eCertificate to the New Exporter Certificate template

- The new Exporter Certificate template was updated on Titan eCertificate to accommodate the name change from DAFF to DALRRD

Update the eAddendum validation on estimated departure date

- This is to Validate that the Estimated Time of Departure is not more than 5 working days (excluding weekends/public holidays)

Flesh Color for Peaches and Nectarines was added to eCertificate

- The flesh color for peaches and nectarines are now displayed in box 9 on the eCertificate

What is next ?

Coming soon

Product Inspection

All other FBO's to be included on Titan Service Request

- This will allow Clients to complete a Service Request for all products on TITAN 2.0®

Electronic Consignment note (PDF)

- The PPECB will provide the Client with a system generated PDF Consignment note which include both parties (Client and Inspector) signatures and the applicable PPECB stamp (Pass or Reject)

eAddendum & eCertification

eAddendum error 500

- An improvement will be implemented to make this error message more descriptive

Net and Gross Weight calculation

- The system will accept the SSCC (pallet) Net/Gross weight the client send
- This weight will be generated on the eAddendum and eCertificate

End Point to query Product Inspection data

- This will allow Exporters and C&Fs to query the Inspected data for eAddendum submissions
- This will assist with Validation errors on eAddendum submissions
